Please find below and/or attached an Office communication concerning this application or proceeding.

| | | | |
|------------------------------|--------------------------------------|--------------------------------------|--|
| Office Action Summary | Application No. 10/747,891 | Applicant(s) KIM, CHANG HO | |
| | Examiner Jerry Redman | Art Unit 3634 | |

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 March 2006 and 19 May 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the outer contact member formed on said stabilizing assembly that contacts said door panel as recited in claim 1, lines 9-10, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3634

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese patent No. 2001-0059808 to Park in view of Grier (4,785,585). Japanese patent to Park discloses a door glass guide for a motor vehicle comprising a glass guide (51) mounted to be vertically fixed to a door panel (see figure 5), a garnish (52) joined to an upper end of the glass guide (51) to be vertically arranged, a stabilizing assembly (53) comprising a contact member (the lower portion of the stabilizing assembly (53), the inner contact member is the portion of 53 which contacts surfaces 51a and 52a and the outer contact member is the upper and/or lower surfaces or faces which contacts the adjacent surfaces within slots 51a and 52a) formed on a lower end of the stabilizing assembly (53) that contacts an upper end (51a) of the glass guide (51), and a connector (the upper portion of the stabilizing assembly 53) formed on an upper end of the stabilizing assembly (53) that encompasses a lower outer surface (52a) of the garnish (52), wherein the stabilizing assembly (53) is mounted to the upper end (51a) of the glass guide (51) and encompassing a lower outer surface (52a) of the garnish (52) and formed separate from the garnish (53). Japanese patent to Park (2001-0059808) fails to disclose an elastic run channel secured to the garnish and extending to the glass guide. U.S. patent to Grier (4,785,585) discloses a garish (26) connected to a glass guide (46, see Figure 3) via a stabilizing assembly (70) and further having a suitable weather stripping/elastic glass run channel (column 2, lines 19-21) attached therein. It would have been obvious to one of ordinary skill in the art at the time of the invention to

Art Unit: 3634

provide the door glass guide of Japanese patent to Park (2001-0059808) with an elastic glass run channel as taught by Grier ('585) since an elastic glass run provides a sealing function of a door glass between an open and closed position as well preventing the door glass from contacting metal. Although it is inherent that the Japanese patent to Park discloses a glass run channel and almost all automobile doors since automobile doors have been around have glass run channels and that a translation of the Japanese patent to Park probably discloses a glass run channel, the Examiner has provided the combination with Grier having a glass run channel to expedite the prosecution of the application.

Any inquiry concerning this communication should be directed to Jerry Redman at telephone number 571-272-6835.

Jerry Redman
